Read the passage below and then answer questions 26 to 38.

In any political process, human rights is a very fundamental component that requires upgrading oftenly. A democratic constitution considers greatly human rights. A state of good governance is said to have been achieved when human rights are respected. The existence of any human race depends on the fact that we recognize every citizen's right to live and to enjoy freedom and security. Failure to guarantee each person their human rights means that the human family is staring extinction in the face.

All over the world, there has been an extensive abuse of human rights and liberties. Days are not forgotten yet when the police brutality was the order of the day. The officers charged with the responsibility of protecting the citizens would mercilessly club and kick one senseless in the name of maintaining law and order. Due to the many chances of misuse and abuse of human rights, the issue of human rights should therefore be central in any government.

Kenyans have the freedom of expression and individuals are free to express themselves even if the views are not in line with those of their leaders. In this particular respect, we should never allow these rights, which are basic, to be denied to us. No longer must we allow detention without trial to be used as a weapon to silence those who dare raise their voices against gross injustices in society. Subsumed in the concept of human rights are children's rights. For a long time, society has tended to ignore this area. Stories are reported in the newspapers of children being tortured, even by their close relatives. They are also forced to work, denied the opportunity to go to school, married off when they are of school age and circumcised against their own will. Even more horrifying are cases in which defenceless children, sometimes just a couple of months old, are brutally defiled. To make matters worse, others are wrapped in plastic bags and thrown in dumping sites, along the road or in forests to be devoured by scavenging animals.

Another form of serious violations on children's rights is child labour. Over the years, this has been on the increase. Young children are all over being forced to work in dangerous and exploitative ways. Some are employed to work at homes, plantations or are even getting involved in street trading. Children are not physically suited to strenuous work and if they are exposed to it, they suffer the effects of fatigue more than adults. Their labour has an effect on their physical and intellectual development. Due to the fact that these children have to attend to work, they do not get opportunities to attend school.

The problem of child labour can only be solved if its main cause, which is poverty, is clearly addressed. It is clear that agriculture cannot provide enough income for most people and their families. Hence, there is need for people to look for alternative ways of earning a living. Thus, to help their families, most children find themselves being employed. As a result, these children suffer from disease and malnutrition. Most governments all over the world have come up to criminalize the aspect of child labour and state serious actions to be taken upon people who abuse children.

Moreover, children have grown to become victims of sexual exploitation. This jeopardizes their survival and also retards their development. To help children overcome all these hardships, a number of things have to be done. First, the society has to be educated on children's rights, including the children themselves. Then, a number of projects have to be implemented to protect the most vulnerable of humankind. This should include access to education and health care and preservation of human dignity. Finally, without legislation to protect children's rights, these atrocities are bound to increase.

Read the passage below and then answer questions 39 to 50.

Kesha spent her childhood days at her grandmother's home. She would often tend the pigs, cows, chicken and rabbits. Her mother had passed on immediately after she saw the sun's rays. Her father was a regular drunkard and could therefore not be entrusted with the responsibility of bringing her up. However, the grandmother was so poor that they missed many essential needs. Though, the grandmother struggled hard enough to see that her grandchild got education just like other children. Kesha walked to school barefoot, but that did not matter. For her, she was determined to study hard so as to realize her goals. At school, other pupils would make fun of her due to her poor state, but still, **she turned a deaf ear to their ridicule**. Mostly, she wore tattered clothes that had patches all over such that it was hard to know the real colour of the cloth.

Throughout her life, Kesha could not remember having a mother around. She only remembered her grandmother, Chewa. Her grandfather was just as careless and irresponsible as her father. Kesha's life was centred around the grandmother's home and the school. She was very determined and at the age of four years, she could do arithmetic, read and write legibly. The grandmother's home almost looked deserted as there were no many people. The silent atmosphere gave Kesha a conducive environment to concentrate on her studies. Without playmates, toys, television or even a radio, Kesha used to amuse herself by riding one of the pigs and playing with the rabbits. Kesha only met a crowd of people either at school or church. Fortunately, Kesha had a natural talent for recitation and performance, and she entertained her classmates and teachers. She soon became the little darling of the school community with her acting skills. The teachers and pupils thought that Kesha was gifted and thus began to respect her despite her poor background. And somehow, with no education, her grandmother instilled in her a belief that she should aspire to do great things in her life.

Kesha grew up to become a very good actor. However, she perfectly managed to balance her hobby, acting, and education. She won several prizes at different levels in drama competitions. People from far places began to gain interest in her. With time, they got to learn more about her background and the problems she faced. Many came forth to help her. Thus, Kesha was able to accomplish her education and secure a highly-paying job. This was possible because she explored every talent that she had to improve her life.

The first beneficiary of Kesha's success was her grandmother who had brought her up through thick and thin. Chewa, who was now old enough, became likeable in the neighbourhood. Villagers who never visited her before began paying endless visits to her home to request for her help in one way or another. However, Chewa was not mean, just like her grandchild. Both of them helped the needy from far and wide. To date, Kesha has opened up many education centres in her village. She also talks to young people and encourages them to nurture the opportunities they have because one's luck could lie in one's personal talents. She also encourages young people not to give up despite the hardships they face in life as they could be the source of their success.

Kwa hali yoyote ile, binadamu huhitaji amani ili kuendesha shughuli zake kama vile inavyotakikana. Hakuna jambo lolote la manufaa ambalo linaweza kutokea katika mazingira ambayo hayana amani. Hivyo basi, yapo maana ya kukuza uwepo wa amani na utulivu katika maeneo ambayo tunaishi. Hili ni kwa sababu ukosefu wa amani na utulivu husababisha gharama kubwa ambayo haiwezi kulipika kwa urahisi. Aghalabu, watu hupoteza maisha yao, mali ya watu huharibiwa na vile vile haki za watu kukiukwa kwa kiwango kikubwa. Isitoshe, maendeleo katika maeneo yasiyokuwa na **amani hutoweka kama moshi**. Miradi yoyote ya maendeleo iliyokuwa imeanzishwa hapo awali hutumbukia nyongo.

Katika taifa letu, jamii zinazozozana ni kielelezo bora cha matokeo ya ukosefu wa amani maishani. Hapa petu nchini, kwa mfano, tatizo la wizi wa mifugo limeshamiri na kukita mizizi. Nazo athari zake huwa dhahiri miongoni mwa wanajamii wenyewe na taifa nzima kwa jumla. Kwanza, jamii zenyewe hulazimika kuhama maeneo yao hadi sehemu zenye amani. Wao huacha mali yao na katika hali ya kuhama, familia zao husambaratika. Upweke na ukosefu wa furaha na utulivu huzidi. Jamii zinazoshikilia uovu wa wizi wa mifugo humu nchini hushikilia dhana potovu kuwa hii ni njia murua ya kuchuma riziki isiyo na kifani. Wengi wanaotekeleza uovu huu huwa hawataki kuchoka au kumwaga jasho kwa lolote lile. Huu ni uzembe kwani kila mtu anapaswa kujua kuwa **mtaka la waridi sharti adhurike**. Isitoshe, mali ya mwenyewe haiwezi kutegemewa kamwe kwani hii ni nguo ya kuazima. Sharti kila mtu awe tayari kufanya kazi ili apate ufanisi.

Ukosefu wa ajira miongoni mwa vijana ni changamoto kubwa sana hapa nchini. Wanapokosa gange, vijana wengi huingilia vitendo hasi kama vile wizi wa mabavu na ukahaba, vitendo ambavyo huvuruga amani katika jamii. Inashangaza sana kuona jinsi vijana wanavyotumiwa na wanasiasa kuzua uzushi. Wanapoitisha mikutano wanasiasa hawa, vijana huhudhuria mikutano hii kwa wingi, jambo linaloonyesha kuwa vijana wengi huwa hawana kazi ya kufanya. Kupitia mikutano hii, wanasiasa hupata nafasi ya kufukia mbegu ya uhasama, ukabila na chuki kwa matamshi yao. Badala ya kuhubiri amani, wao huvuruga amani ambayo tayari imekuwa ikisheheni. Wanasiasa kama hawa wanapaswa **kula kalenda** kwa maovu yao. Vile vile, vijana wanapaswa kushauriwa dhidi ya kufuata ushawishi wa viongozi usioleta manufaa kwao. Waweze kuwa na akili ya kujua mazuri na mabaya yanayohubiriwa na wanasiasa hawa. Nayo serikali inapaswa kuunda nafasi za ajira ili kukidhi mahitaji ya vijana, jambo ambalo litasaidia kupunguza uovu unaotekelezwa na vijana. Vile vile, lazima kila mtu awe tayari kufanya kazi yoyote bila ya kuwepo kwa ubaguzi wa kikazi. Watu wengi, hasa vijana hubagua kazi. Vijana wengi hupenda kufanya kazi za kifisi au za starehe zisizohitaji nguvu nyingi kwani hawapendi kuchoka. Hata hivyo, kazi hizi huwa ni chache mno na mara nyingi zimeadimika kama wali wa daku. Hivyo basi, vijana wengi hubakia bila ajira.

Ili kukuza amani katika jamii, sharti maadili kama vile upendo, kufanya kazi kwa bidii na utangamano yakuzwe miongoni mwa wanajamii. Aidha, usawa wa makundi yote katika jamii lazima uhimizwe, hivyo basi maskini ama walemavu wasipuuzwe katika jamii. Mwishowe, lazima tofauti za kisiasa, kikabila na kimaisha zitupwe katika kaburi la saha.

Siku yenyewe ilipotimia nikiwa buheri wa afya, nilimrudishia Mola shukrani zisizo haba. Ilikuwa ni siku ambayo mimi pamoja na nyanya yangu aliyekuwa amebugia chumvi ya kutosha tungenda mjini. Nyanya alitaka kumtembelea mjukuu wake, Karisa, ili apate matibabu kwani alikuwa anaugua. Uwele ulikuwa umemfanya aonekane dhambi na asiye na siha njema. Basi asubuhi hiyo, baada ya kufanya matayarisho yaliyohitajika, **nilimpa mziwanda wangu mkono wa buriani**. Hakusahau kunituma salamu kwa Karisa, ambaye ndiye aliyekuwa kifungua mimba katika familia yetu. Niliandamana na bibi hadi kwenye kituo cha mabasi.

Tulisuburi pale kwa dakika kama ishirini hivi kabla ya matwano moja kufika stanini. Bila kuwa na fikira zozote, tulijitoma mle ndani huku tukitarajia kufika mjini salama salimini. Katika muda wa kupiga ukope, daladala ile ilijas watu mithili ya siafu na muda si mwia, safari yetu ikang'oa nanga huku kila mmoja wetu akionekana kuwa mchangamfu. Nyanya alikuwa amesheheni uchangamfu mwingi. Kwa muda wa dakika chache, gari liliondoka pale stanini. Mwendu wenyewe ulikuwa ni ule wa kasi. Ndani ya gari, watu walirushwa kutoka upande mmoja hadi ule mwingine. Licha ya hayo, mifugo waliokiriwa wamejazwa pale garini wote walilalamika kwa maumivu. **Hata nafasi ya kutema mate haikuwa**. Isitoshе, muziki ulidunda na kuhinikiza dududu kama baruti katika machimbo ya mawe. Watu walilalamika kuhusu jambo hilo, lakini ole wao! Dereva mwenyewe alionekana katika komango masikioni. Waama, sikio la kufa halisikii dawa.

Kila mmoja wetu alishikilia roho mikononi huku akimwomba Maulana afike salama. Hata mimi mwenyewe sikuwa na wakati wa kujionea mandhari, jambo ambalo nililipenda sana. Nilijaribu kumsihi dereva apunguze mwendo lakini hilo lilikuwa ni kama kujenga nyumba ya karatasi. Nilivyoona hivyo, basi niliamua kutupa jongoo na mti wake. Usingizi nao ulinipata, lakini singeweza kulala vizuri kwa sababu ya makelele yaliyosheheni mle ndani ya gari. Dereva mwenyewe alijawa na tamaa, hata akaamua kuiendesha gari hilo kwa mwendo wa juu. Ya wahenga kuwa haraka haraka haina baraka yalimpaa akilini. Kondakta naye alikuwa mtukutu ja mkia wa mbuzi. Alitisha nauli kutoka kwa wasafiri kwa njia isiyo na beshima. Alibweka na kutca maneno ya matusi, bila kuzingatia aliyonena.

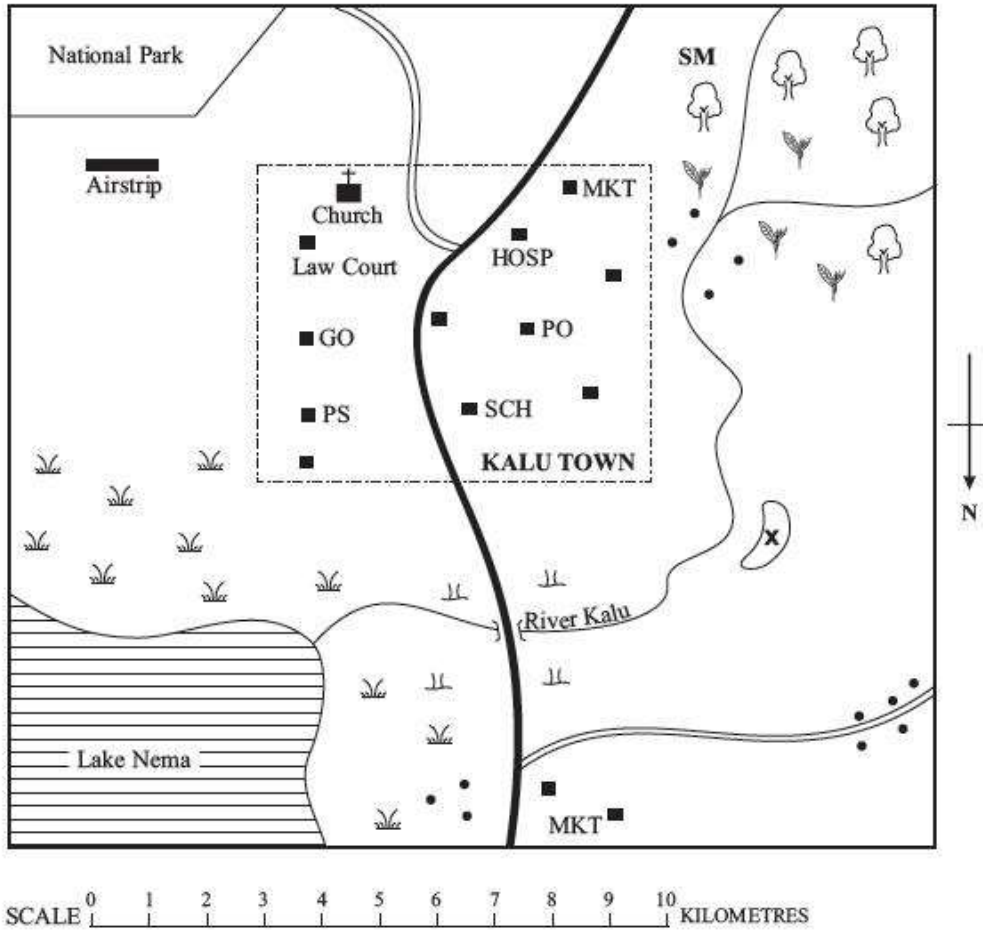

Tulipita milima na mabonde huku gari likidanadana kama mpira. Tulitarajia kufika mjini mwendo wa jua la utosini. Hata hivyo, hilo halikuwa litimie, ndiposa wahenga wakasema ya kwamba usimkatie mtoto kanzu kabla hajazaliwa. Takriban kilomita kama ishirini hivi kutoka mjini, jambo ambalo halikutarajiwa lilitokea. Niliusikia mlipuko mkubwa kama wa bomu. Kutanabahi, damu ilikuwa imetapakaa kote barabarani. Viwiliwili vya watu vilikuwa vimeangaka mahali pa ajali na maeneo yaliyokuwa karibu na eneo hilo. Ama kweli, waliosema kuwa ajali haina kinga wala kafara hawakukosea. Nilijaribu kuangaza angaza pale na pale nitafute nyanya yangu, licha ya kuwa pia mimi nilikuwa nimeumia. Nilipomwona nyanyangu, moyo wangu uliatuka. Nyanya alikuwa akibebwa na wahisani waliokuwa wakiwaingiza manusum katika gari la ambulensi. Nyanya mwenyewe alikuwa si wa maji si wa uji. Hata mimi niliwekwa ndani ya gari hilo. Hatimaye, tulipelekwa hospitali kuu. Tulilazwa hapo kwa siku ayami huku takiendelea kupokea matibabu. Ama kweli, lisilo budi hubidi.

 - the pressure of water increases with depth
 - more water will pass through the bottom than at the top

10. Birds that feed on flesh have
- strong, short, curved beaks
 - long, straight, broad beaks
 - long, slender, curved beaks
 - straight, short, slender beaks

11. Plants Q, R, S and T had the following characteristics:
- Q - Needle-like leaves, thick cuticle
R - Flexible stem, floating leaves
S - Deep rooted, sunken stomata
T - Many stomatas, air sacs

Which pair of plants are adapted to the same habitat?

- Q and R
 - Q and S
 - Q and T
 - S and R
12. The diagram below shows an experiment that was set by pupils during a Science practical lesson.

Pupils observed that the weather instrument was **not** functioning well. Which mistake were they likely to have made?

- Using a wrong scale
- Using a narrow straw
- Using a thin walled glass bottle
- Using a coloured straw

13. A small piece of stone sinks in water while a log of wood floats. This is because of the difference in their
- size
 - mass
 - shape
 - material
14. The soil that allows water to rise highest has three of the following characteristics **except**
- large particles
 - small air spaces
 - cracks when dry
 - makes long ribbons
15. Which one of the following crop pests is **correctly** matched with the part of the plant it attacks?
- Aphids - Stems
 - Cutworms - Grains
 - Weaver birds - Cereals
 - Stalkborers - Roots

16. The force that opposes motion can be increased in three of the following ways **except**
- making treads on wheels
 - streamlining bodies
 - spreading coarse material on the point of contact
 - making the surfaces that are in contact rough.

17. The following materials were collected by pupils during a Science practical lesson:
- Water in a basin
 - A clean mirror
 - White board

Which aspect of light were they investigating?

- Dispersion of light
 - Refraction of light
 - Reflection of light
 - How light travels
18. Which of the following organic manures takes the longest time to prepare and release nutrients to crops?
- Organic mulches
 - Farm Yard Manure
 - Compost manure
 - Green manure

19. The following are characteristics of matter:

- (i) Have definite shape
- (ii) Have definite volume
- (iii) Have definite mass

Which materials have **all** the above characteristics?

- A. Flour and sand
- B. Milk and kerosene
- C. Water and air
- D. Steam and stones

20. Which materials are **correctly** matched in the table below?

Transparent	Translucent	Opaque
A. Milk	Mirror	Light cloth
B. Air	Clean water	Mirror
C. Clean water	Frosted glass	Heavy cloth
D. Sky light	Heavy cloth	Milk

21. The chart below shows classification of plants.

Which plants are represented by letters U, V, W and X respectively?

- A. Maize, pine, mould, yeast
- B. Peas, mushroom, athletes foot, penicillin
- C. Carrot, cedar, ringworm, mushroom
- D. Algae, beans, onion, moss

22. Which one of the following uses of the components that make up 78% and 0.03% of air is **correctly** placed?

78%	0.03%
A. Making proteins	Putting out fires
B. Putting out fire	Germination
C. Supporting burning	Making proteins
D. Germination	Supporting burning

23. Which list consists of various ways in which plants depend on each other for survival?

- A. Habitat, shade, food
- B. Pollination, manure, medicine
- C. Decomposition, pollination, support
- D. Support, shade, habitat

24. The following are some safety measures:

- (i) Never overload sockets
- (ii) Avoid walking in open fields
- (iii) Fit tall buildings with arrestors
- (iv) Never put sticks in sockets
- (v) Never put up building under electricity masts
- (vi) Never lean on the wall

Which list consists of safety measures to be taken against lightning when it is raining?

- A. (i), (iii), (iv)
- B. (ii), (iii), (vi)
- C. (iii), (iv), (vi)
- D. (ii), (iv), (vi)

25. A class seven pupil accidentally mixed sand, salt and aluminium pieces of metal. Which is the correct order to follow for the pupil to obtain salt only?

- A. Use of a magnet, dissolving, filtering and evaporation
- B. Dissolving, use of a magnet, filtering and evaporation
- C. Dissolving, filtering and evaporation
- D. Dissolving, evaporation and filtering

26. Which one of the following types of soil erosion is **most** likely to cause a landslide?

- A. Rill erosion
- B. Sheet erosion
- C. Splash erosion
- D. Gully erosion

27. Pupils observed a house girl in a nearby school compound using the same water she used to wash clothes to clean the house. In this activity, the house girl was

- A. recycling water
- B. storing water
- C. re-using water
- D. using water sparingly

28. The illustration below shows the processes that bring about changes in states of matter.

Which letters represent a pair of processes that require an increase in temperature?

- A. (ii) and (iii)
 B. (i) and (iii)
 C. (i) and (iv)
 D. (ii) and (iv)
29. The diagram below represents a set-up that was used to show how pupils dropped a textbooks from different heights from the surface of a table.

Which aspect of sound was being investigated?

- A. Noise pollution
 B. Special sounds
 C. Direction of sound
 D. Loud and soft sound

30. Standard seven pupils prepared the table below on the advantages and disadvantages of friction.

Group	Advantage	Disadvantage
M	Walking on roads	Causing tear
N	Erasing with a rubber	Making work hard
O	Lighting a match box	Riding bicycles
P	Braking a bicycle	Causing wearing out

Which group gave an **incorrect** answer?

- A. Group M
 B. Group N
 C. Group O
 D. Group P
31. What is the purpose of valves in the veins in blood circulation?
 A. They increase the blood pressure
 B. They guide the blood flow
 C. They stop the blood from flowing backward
 D. They maintain the blood pressure which is high

32. The following are some planets in the solar system:

- (i) *Jupiter*
 (ii) *Neptune*
 (iii) *Saturn*
 (iv) *Uranus*

Arrange them in order, starting from the one furthest from the sun

- A. (ii), (iii), (iv), (i)
 B. (iv), (ii), (iii), (i)
 C. (i), (iii), (iv), (ii)
 D. (ii), (iv), (iii), (i)
33. Which of the following animals are **correctly** placed under component of the environment they depend on for shelter?
- | Soil | Plants |
|-------------|----------|
| A. Termites | Bacteria |
| B. Rats | Monkeys |
| C. Moles | Termites |
| D. Bacteria | Birds |
34. Which one of the following is the **most** important to consider when buying medicine from a chemist?
 A. The date of expiry
 B. The date of manufacture
 C. How to store the medicine
 D. The dose

35. A child's skin appeared pale. His eyes and fingernails appeared white. The child is also likely to have
- sores at the corners of the mouth
 - looked like an old person
 - felt like fainting and dizzy
 - had visible bones underneath the skin

36. Which one of the following pairs of forms of energy can be transmitted only when there is a medium?
- Heat and light
 - Sound and electricity
 - Sound and light
 - Heat and electricity

37. The following shows the arrangement of the load, effort and fulcrum in a certain lever.

Which one of the following levers is illustrated above?

- Wheelbarrow
 - Crowbar
 - Spade
 - Claw hammer
38. The following are functions of stems in plants:
- Holding the branches
 - Storage of food
 - Transportation of water and mineral salts
 - Breathing
- Which one of the following is performed by **all** stems?
- (i) and (iii)
 - (ii) and (i)
 - (i) and (ii)
 - (ii) and (iv)
39. Which one of the following pairs consists only of materials that are magnetic?
- Aluminium foil and silver shilling coin
 - Shilling coin and sewing needle
 - Sewing needle and office pins
 - Office pins and aluminium foil

40. Four children X, Y, W and Z all under four years eat the following types of food daily:

X - Potatoes, rice, spinach

Y - Oranges, beans, cabbage

W - Fish, eggs and ugali

Z - Chapati, cabbage, tomatoes

Which two of the children are likely to suffer from kwashiorkor?

- X and Z
 - Y and Z
 - X and W
 - Y and W
41. Clouds which most often give rise to rainfall are
- thick, white and appear like bundles of cotton wool
 - high, feathery and made up of rounded masses
 - low, grey and have a mountainous shape
 - thick, grey, feathery and have a mountainous shape
42. The method used to remove permanent hardness in water is
- filtering
 - distilling
 - boiling
 - using chemicals
43. Tamsi kicked a ball along a flat floor. The ball rolled and eventually stopped on its own. The **main** reason was that
- the force of gravity enabled it to stop
 - there was wind acting in the opposite direction
 - air in the ball increased resistance
 - the force of friction was acting on the ball
44. Which method of food preservation is **wrongly** matched with its mode of preservation?
- Canning** - kills bacteria and removes air
 - Freezing** - kills bacteria and fungi
 - Smoking** - keeps off bacteria and fungi
 - Use of low temperature** - discourages growth of bacteria and fungi

45. Educating masses is a way of controlling HIV/AIDS. It could be carried out through all the following **except**
- A. public rallies
 - B. workshops
 - C. weddings
 - D. seminars

46. The diagram below represents a set-up that can be used to demonstrate a certain process.

- Which of the following processes is being demonstrated?
- A. Diffusion
 - B. Radiation
 - C. Conduction
 - D. Convection
47. Which of the following groups of animal feeds provide livestock with mineral salts only?
- A. Green fodder, fruits, honey
 - B. Bonemeal, fish meal, salt lick
 - C. Maize germ, bran, molasses
 - D. Fish meal, legumes, banana stem

48. Which one of the following parasites do not attack a pig?
- A. Lice
 - B. Fleas
 - C. Ticks
 - D. Mites

49. The following practices help to prevent the spread of diseases:
- (i) *Covering pit latrines after use*
 - (ii) *Spraying chemicals in stagnant water*
 - (iii) *Wearing protective clothing when walking in stagnant water*
 - (iv) *Draining stagnant water*

Which two practices help to prevent the spread of **both** malaria and bilharzia?

- A. (ii) and (iv)
 - B. (i) and (ii)
 - C. (iii) and (iv)
 - D. (ii) and (iii)
50. In which of the following sources of energy is **correctly** placed under renewable and non-renewable?
- | Renewable | Non-renewable |
|---------------|---------------|
| A. Wind | Charcoal |
| B. Coal | Petrol |
| C. Water fall | Firewood |
| D. Biogas | Cooking gas |
